

INSTALLATION TIPS

HANDLE BAR KITS

FIRST – remove your stock handle bar top clamps, replace with Billet handlebar top clamp dog bone provided. If your kit has key switch or indicator light provisions, install them first.

1 There are two wires coming out of the lights one goes to your common or "ground" slot on the plug, and one goes to your HIGH BEAM slot on your plug. It does not matter which wire is the ground and which is the hot on Halogen but it does matter on HID.

2. Be sure that your LAZER STAR'S are securely mounted and that nothing is touching them so as not to blemish the finish including cables.

3. When all is working correctly the lights should be off in the 'off' and the 'low' position and should be on in the 'high' position.
